TRI-TEC SEAL RECEIVES ISO 9001 CERTIFICATION

Swartz Creek, MI - Tri-Tec Seal, LLC, a leader in PTFE rotary shaft sealing solutions, has been awarded the ISO 9001:2008 certification. This recognition is for its excellence in Design, Manufacture and Distribution of PTFE Rotary Seals and Related Products for Commercial and Industrial Use.

The certification comes as Tri-Tec looks to further its strategic business objectives by developing partnerships and customer opportunities and providing superior quality sealing solutions to its customers. Tri-Tec's Quality Team has been diligently working towards achieving the ISO certification since early this year, and is proud to join an elite group of international organizations that have made their preferred quality standard ISO 9001, as this reinforces our credentials as an industry leader in the field.

ISO 9001 is a quality management standard that is maintained by the International Organization for Standardization. Companies committed to this standard are required to demonstrate highly effective business processes, continual improvement in their quality programs and to increased levels of customer satisfaction. This more robust Quality Management System will improve internal processes, and by following these standards, Tri-Tec will be setting quality objectives and targets that will promote continuous improvement.
